Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 and 35, drawn to a windshield removing apparatus.

Group II, claim(s) 9-22, drawn to a windshield removing method.

Group III, claim(s) 23-33, drawn to a unit used in conjunction with a windshield removing apparatus.

Group IV, claim(s) 34, drawn to a combination of a windshield removing apparatus and a unit used in conjunction therewith.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of mounting means, first and second winder spools for a cutting wire, and a wire wrap around guide element is shown by U.S. Patent 6,616,800.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
